

Powder Coated Custom Colours

- **Strong**
- **Durable**
- **Chip Resistant**

You choose the colour . . . DARLEX, your custom aluminum extrusion provider, will powder coat your application in Safety Yellow or any other custom colour you choose. All we require is a paint sample and we will have the extrusion powder coated to meet your needs. The powder coating process offered by DARLEX provides a strong, durable, and chip resistant finish.

At DARLEX we are committed to providing our customers the fastest and most flexible solutions in the design and manufacture of aluminum machine guards, bases, and special applications.

Our solution services include a complete manufacturing and assembly facility, on-site consultation, CAD design for enclosure or machine base requirements, 4 hour turn-around on quick quote designs for machine guards and bases, and same day delivery on profile lengths up to 6 meters.

Our design team will work with you to ensure cost efficient guarding solutions, reduced engineering costs, more efficient use of space, and a safer operating environment while adhering to the standards set by CSA / OSHA.
